

Building supplies close to home

New London Building Supply has been a fixture in New London for more than 54 years. We, the current owners, Jim St. Marie and Jon Puls, purchased the business almost three years ago. We have many years of experience in all aspects of the building industry.

New London Building Supply is a retail lumber yard that sells almost everything that you need for a building project. Whether you are a contractor or an individual looking to build a deck, garage, house, or anything in between, New London Building Supply could be your one stop shop. We offer free delivery of the materials you purchase and our experienced staff of ten employees will be sure to help with any questions you might have. We can also recommend some of the excellent contractors in our area.

We offer an on sight draftsman to draw your building plans. Whether you have a plan that needs changes, an idea in your mind, a new home, an addition,

or remodeling idea, we can make it happen. Blueprint copying is also available.

New London Building Supply has an on-sight cabinet designer to help with all your kitchen and bath questions. Stop in and see our newly remodeled showroom with many different cabinet and countertop styles on display.

Some of the items we handle are: lumber and plywood, including treated, trusses, roofing, AG steel siding, Andersen and many other window brands, interior and exterior doors, drywall, and millwork. Our store provides numerous tools, door knobs, some electrical and plumbing, hardware and stain, just to name a few.

We would like to thank you for your patronage over the past few years. Please stop in and we'll assist you on your next project whether it's large or small.

New London Building Supply is located at 1718 Mill Street, just south of the hospital.

Cabinet Designer Jennifer Kern assists customers in choosing design, color selection, layout, and various cabinetry styles.

Residential Draftsman Kris Carew can provide customers with a Computer Aided Design (CAD) for any project.
